Forecast for Tuesday 05 Apr 2022

Weather: A cloudy start with outbreaks of rain and drizzle, mainly on western hills. Becoming largely dry by late morning, with bright or sunny spells developing through the afternoon, most likely across the east of the park. Cloud and rain spreading in from the northwest towards midnight. Brisk winds.

Chance of cloud-free hill tops above 600m: 10-20% in west 30-40% in east, increasing to around 90% by midday.

Low cloud and visibility: Widespread cloud with bases around 400-600m, but occasional in the east. Cloud lifting and breaking through the morning to generally be above the summits by midday, and visibility increasing to good.

14:00 on Sun 03 Apr 2022	0.4mm	1.4mm	3.8mm

Forecast for Wednesday 06 Apr 2022

Weather: Rain during the early hours, clearing to occasional showers interspersed by bright or sunny spells. Some of the showers will be heavy with a risk of hail. Snow is also possible on higher slopes later in the day as it turns increasingly cold. It will also be very windy.

Maximum wind: West/southwesterly 25-35mph gusting 50-60mph.

Chance of cloud-free hill tops above 600m: 20-30% during the early hours, otherwise 80-90%

Low cloud and visibility: Extensive low cloud around 400-600m initially. Otherwise cloud bases will generally be above the summits but occasionally lowering to 500m in heavy showers. Visibility generally good but reducing to few km in heavy rain or hail, and very poor in snow showers, with blizzard conditions likely.

Temperature: **Valleys:** 6 C, increasing to 9 C around midday, but quickly lowering through the evening to around 1 C
At 600m: 4 C becoming zero in the evening.
Freezing level: Generally above the summits but lowering to around 600m in the evening.
